USB Serial Drivers Uninstall

- 1. Click on FTDIUNIN.EXE
- 2. Unplug all B&B USB devices
- 3. Click on Continue

If your USB	device is connec	ted, please unplug it now	
Press Continue to uninstall the drivers, or Cancel to quit.			

4. After the Uninstaller runs click on Finish

FTDI Uninstaller	×
Uninstalling VID_0856&PID_AC27 Deleting registry entries Deleting files	
Press Finish to exit.	
Continue	

There may be 2 issues that may not let the uninstaller work:

- 1. If the ftdiun2k.ini file in the system32 folder is read only then file access is denied. Just manually delete the file.
- 2. Another issue you may see is that the uninstaller was broken by Windows update KB923191. The workaround is to go to the system32 folder and right click on the ftdiunin.exe to bring up the properties window. In the properties window select the compatibility tab and change the compatibility mode to Windows 2000. Now run the uninstaller.
